

# SUSTAINABLE FOREST MANAGEMENT TOOLBOX

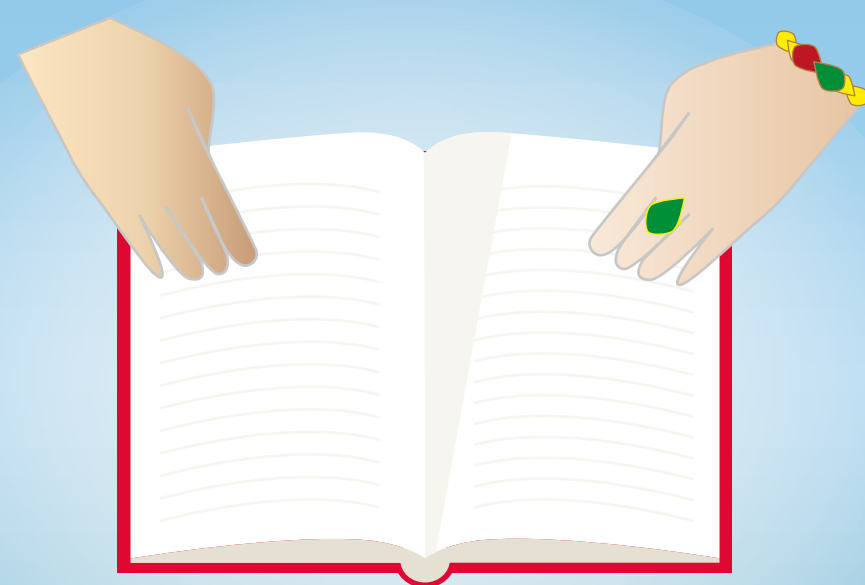

The Sustainable Forest Management (SFM) Toolbox is a free, user-friendly, interactive web-based platform designed to meet the diverse needs of sustainable forest management practitioners, particularly those working at the forest management level.

## TARGET USERS

- forest managers, private or public sector
- practitioners
- land use planners
- civil society and non-governmental organizations
- private sector entities and associations

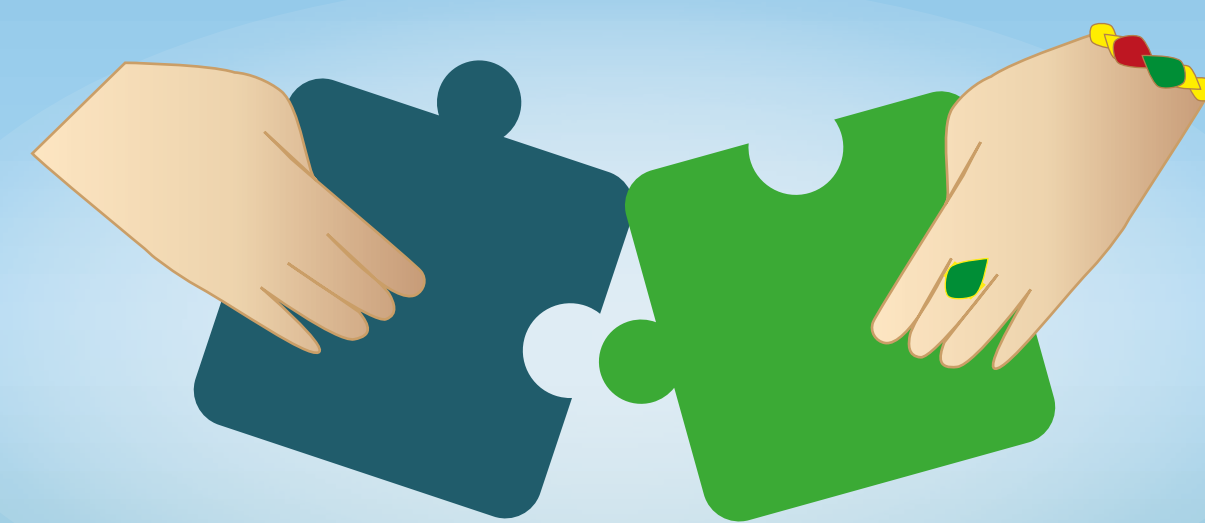

## THE SFM TOOLBOX PROVIDES

**Access** to practical SFM-related knowledge and tools.

**Support and guidance** to forest managers on the integrated implementation of SFM.

**Connections** between a diverse set of SFM-related topics to facilitate an integrated landscape approach.

## STRUCTURE

Technical **modules** organize tools and case studies by thematic area.

**Quick-starts** make searching easier by grouping multiple modules by areas of application of SFM.

## TOOLS & CASES

**Tools and cases** bring together a wide range of guidelines, manuals, videos, software, e-learning products, and case studies produced by FAO and its partners in the Collaborative Partnership on Forests (CPF), as well as by other organizations and by member countries.

## THEMATIC AREAS

The SFM Toolbox provides guidance, practical knowledge and resources on an array of SFM-related topics.
